

MERCHANDISE EXPORT COMMODITIES WITH GROWTH MOMENTUM

The world economy is undergoing testing times with the outbreak of the novel coronavirus hitting markets, and the Indian economy is no exception. It was already reeling under a slowdown, and now the timeframe for revival can extend to several months with no clear projections.

Indian merchandise exports at USD 330 billion in FY19 were just about 8% higher than their FY12 levels. Exports at USD 264 billion during Apr-Jan FY20 have declined by 2.4% over the same period last year. However, we have identified commodities which have shown substantial growth in exports during Apr-Jan 2020 over the previous year.

The following table highlights these commodities, along with their export values and growth rates, and can be tapped by Indian exporters. While the current disruption in supply chains has been unanticipated, we hope these products continue their export momentum, in the coming months.
